

Chargewise

Workflow engine for payment exceptions: disputes + ACH returns + recon breaks — with audit exports and policy gates.

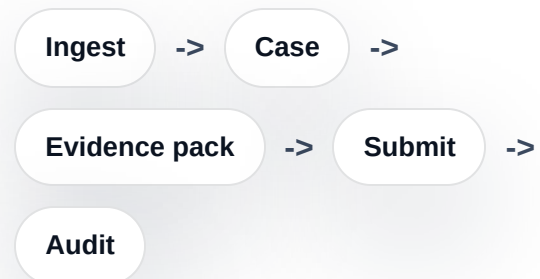

Wedge

- Deadline engine prevents avoidable losses.
- Evidence packs standardize submissions.
- Audit trail proves what happened.

What we are not

- Not a processor replacement.
- Not a generic AI chat wrapper.
- Not fully autonomous for sensitive actions.

Diagram

3 core KPIs (hypothetical targets)

- Deadline miss rate ↓
- Time-to-submit ↓
- Evidence completeness ↑

Why we win

Systems-first

State machine, idempotency, retries.

Audit-first

Exports + verifiable chain.
